SUMMARY

Full Stack Developer with hands-on experience building and deploying responsive web applications using React.js, Node.js, Express.js, MongoDB, Flask, and REST APIs. Experienced in developing secure authentication systems, role-based authorization, CRUD applications, responsive dashboards, automated testing, and production deployments. Also experienced in AI-powered applications, semantic search, OCR, Firebase, and multi-agent AI workflows. Strong problem-solving skills with a focus on writing clean, maintainable, and user-focused software.

EDUCATION

Karachi Institute of Economics & Technology (KIET)

Bachelor of Science in Computer Science

2022–2026

EXPERIENCE

Full Stack Developer Intern

July 2026 Cohort

NeuroFive Solutions

Remote

- Developed and deployed full-stack web applications using React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT authentication.
- Built a freelance management system with role-based access for freelancers and clients.
- Developed CRUD functionality for clients and projects with ownership validation, protected routes, input validation, and error handling.
- Implemented responsive dashboards with project metrics, search, filtering, sorting, loading states, and empty/error states.
- Integrated frontend and backend services using REST APIs and Axios.
- Implemented role-based authentication and authorization to protect application resources and user-specific data.
- Developed and maintained automated frontend and backend tests, achieving 12 passing tests across the application.
- Optimized application performance, resolved CORS and deployment issues, and deployed the application using Vercel.
- Used Git and GitHub for source control and remote development workflows.

PROJECTS

FreelanceHub-PK - Freelance Management Platform | React.js, Node.js, Express.js, MongoDB, JWT, Axios, Vercel

- Developed a full-stack freelance management platform connecting freelancers and clients through role-based user workflows.
- Implemented secure JWT-based authentication and authorization for protected user and project resources.
- Built CRUD functionality for managing clients, projects, and freelance work records.
- Added ownership validation to ensure users can access and modify only their authorized resources.
- Developed responsive dashboards with project metrics, search, filtering, sorting, loading states, and empty/error states.
- Integrated the React frontend with backend REST APIs using Axios.
- Added input validation, centralized error handling, and protected routes to improve application security and reliability.
- Wrote and maintained automated frontend and backend tests, achieving 12 passing tests across the application.
- Deployed the application using Vercel and resolved CORS and production deployment issues.

True Hadith - AI-Powered Hadith Verification App | Flutter, Flask, FAISS, PostgreSQL, Firebase, OCR

- Built an AI-powered Hadith verification application using Flutter, Flask, and FAISS to enable semantic search across 19,000+ Hadith from major collections.
- Engineered a FAISS vector index over the Hadith dataset to provide near-instant semantic retrieval compared with manual searching.
- Implemented OCR and speech-to-text pipelines to extract and process religious text from images and audio.
- Integrated multilingual support for Arabic, English, and Urdu to improve accessibility for non-English-speaking users.
- Implemented Firebase authentication and user-focused application features.

Synapse - Agentic AI Market Research System | React.js, Flask, CrewAI, OpenAI APIs, SQLite

- Developed a multi-agent AI system using CrewAI and OpenAI APIs to automate market research, analysis, and report generation.
- Built a React.js dashboard to display research insights and real-time workflow updates.
- Designed end-to-end AI workflows using multiple specialized agents for research, strategic analysis, and report generation.
- Implemented agent-based workflows for multi-step research tasks and automated report generation.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Flutter

Backend: Node.js, Express.js, Flask, REST APIs

Programming Languages: JavaScript, Python

Databases: MongoDB, PostgreSQL, SQLite

AI & Machine Learning: CrewAI, OpenAI APIs, FAISS, OCR, Semantic Search

Tools & Technologies: Git, GitHub, Firebase, Vercel, Axios

Core Skills: Full Stack Development, Web Application Development, Mobile App Development, Backend Development, REST API Development, Authentication & Authorization, CRUD Operations

CERTIFICATIONS

Full Stack Web Development Virtual Internship — NeuroFive Solutions | July 2026 Cohort | Certificate ID: 26070538 |
Verification: neurofivesolutions.com/verify
